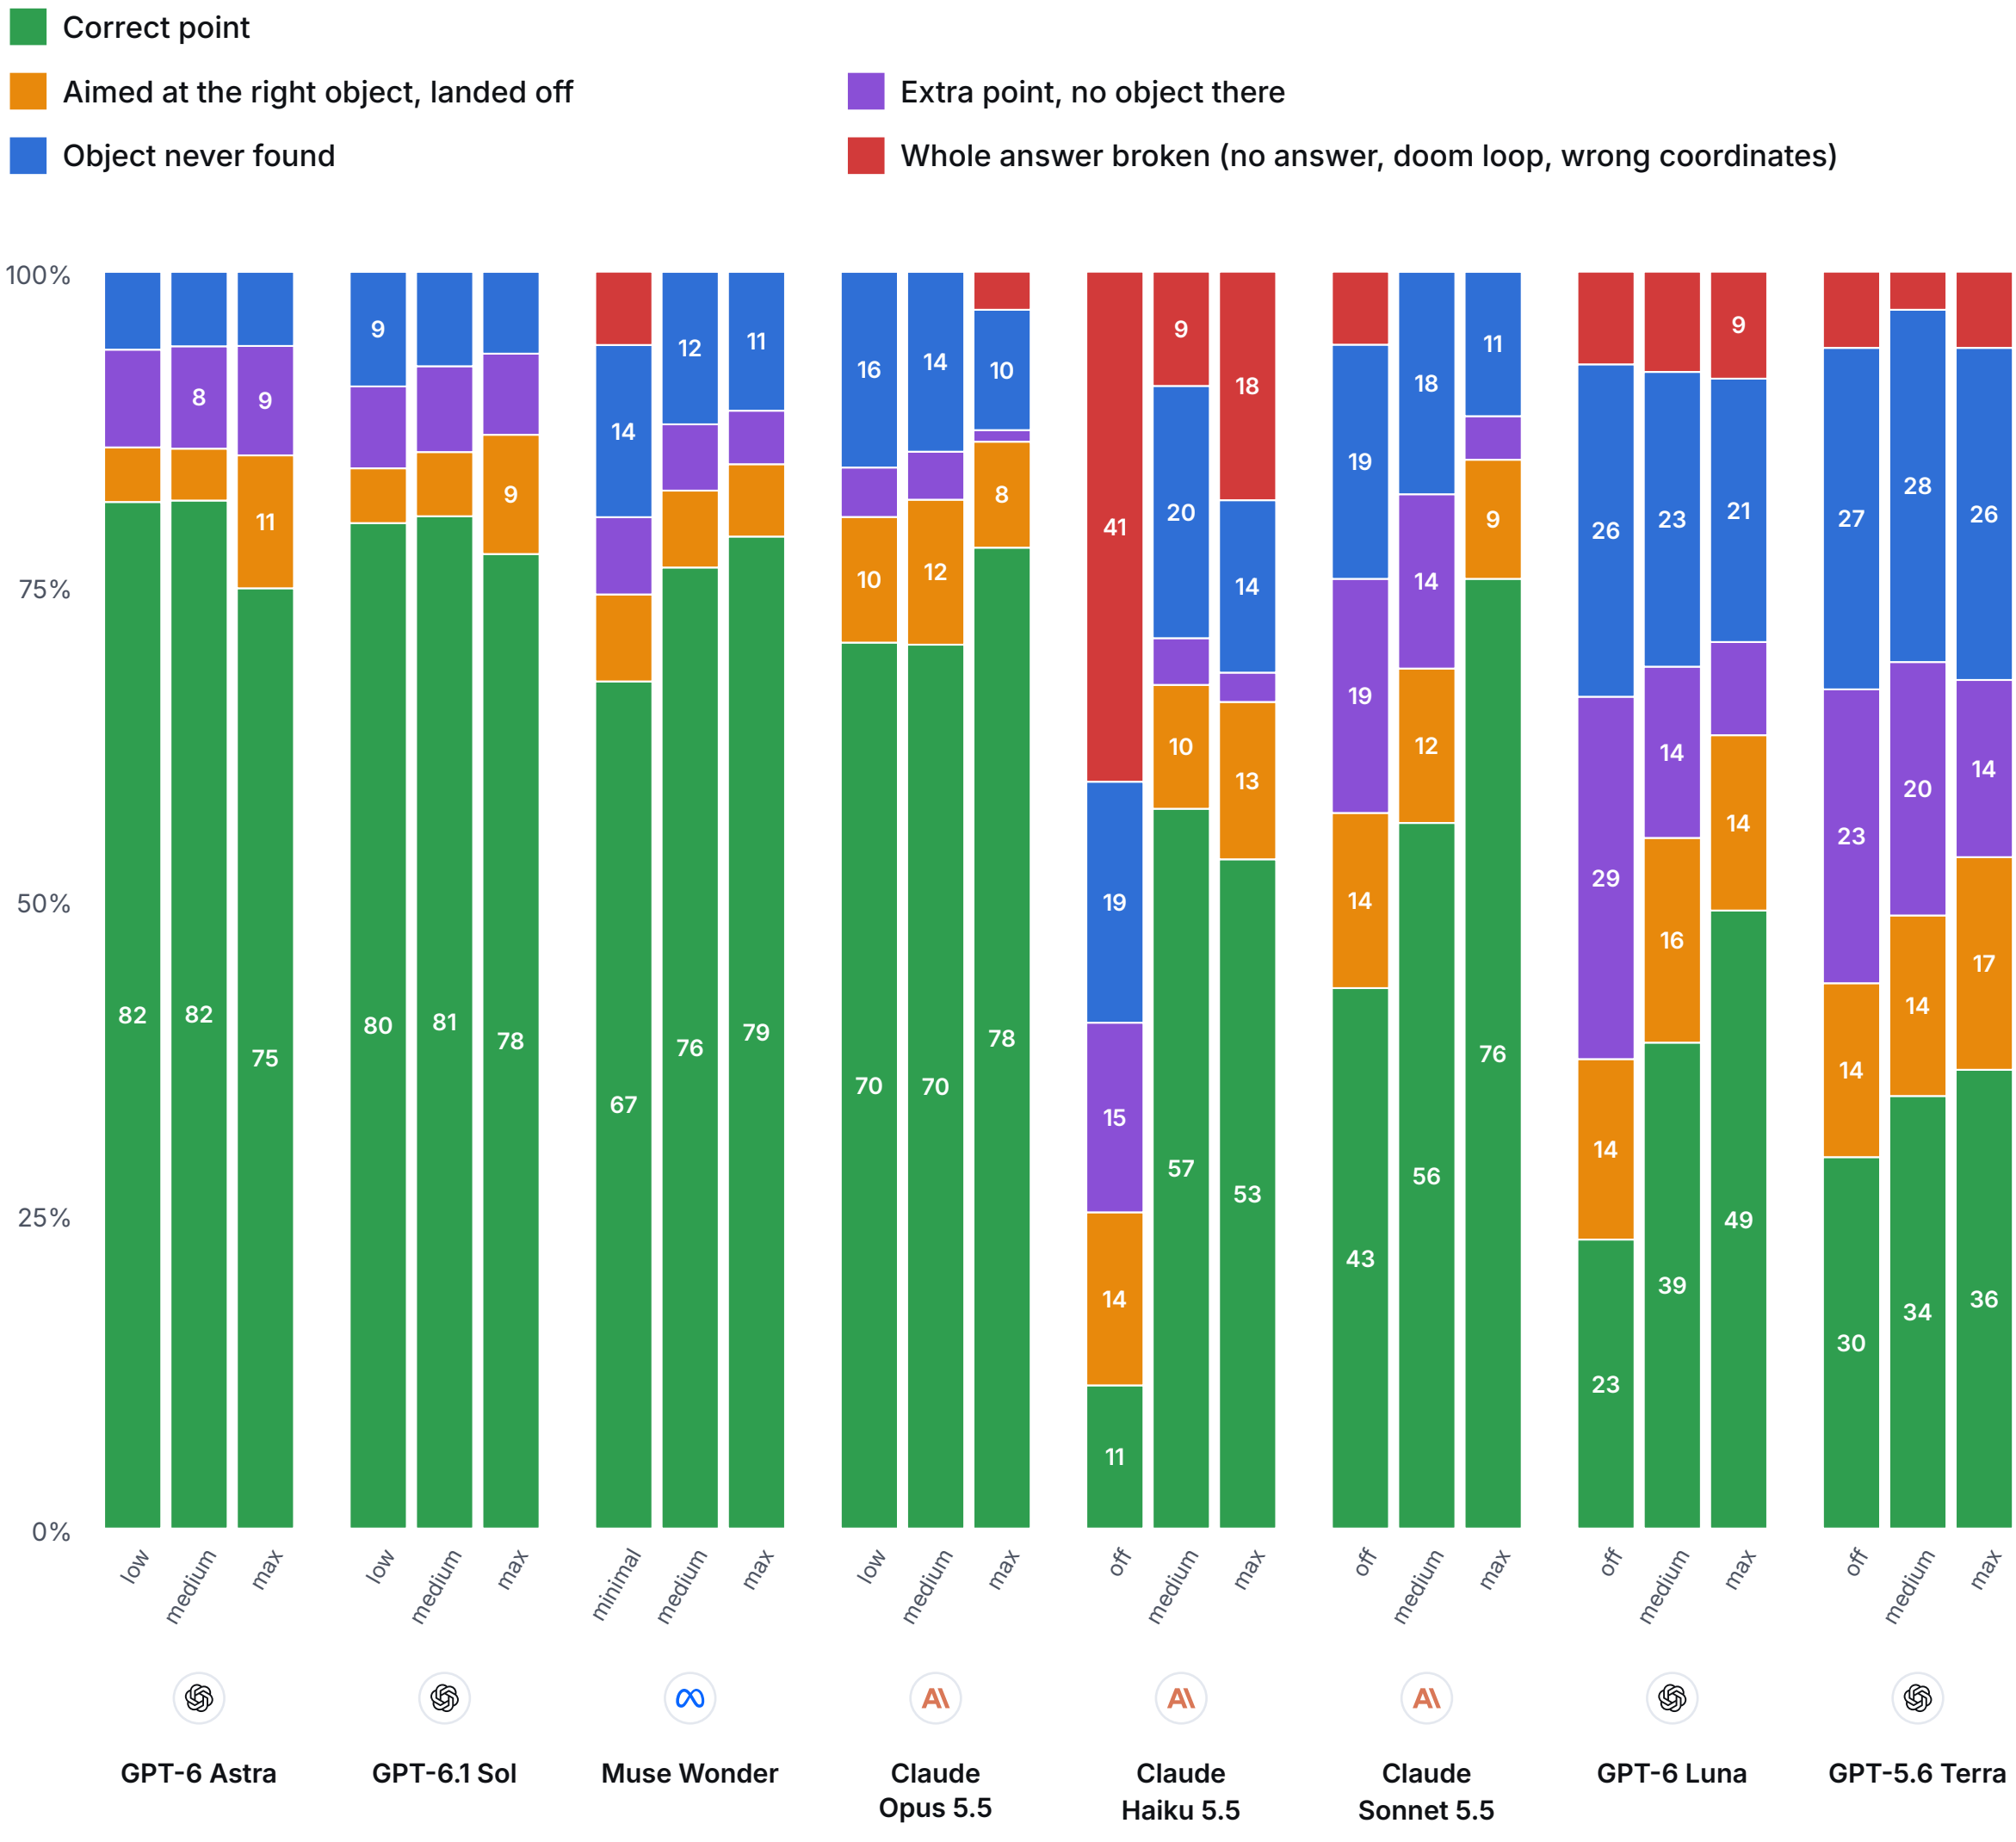
Does thinking change where the points land?

Each model at its least, medium and most thinking: every correct point, wrong point and unfound object, as a share.



791 answers: 8 models x 3 thinking settings, 11 photos, 3 tries (one GPT-5.6 Terra answer at max never arrived). "off": thinking turned off; "low" or "minimal": the model cannot turn it off, its least. Medium is the setting on the published charts. Sorted by correct points at medium. Numbers under 8% not printed.
